

RefundSM - Implementation Plan				
Database	RefundSM			
Step	Action	Script	Notes	Software
1	Run script to create database	1DatabaseScript.sql	May have to modify the physical paths	SQL 2008; scripted for SQL 2000
2	Run script to create tables	2Tables.sql		
3	Run script to create user	3user.sql		
4	Run script to create stored procedures	4sps.sql		
5	Run script to insert the data in the company, vendor and claim type tables	5DataInsert.sql		
Application	RefundSM			
Step	Action	File	Notes	Software
1	Project type ASP.NET Web Site		I am not sure of the procedure for moving this application to the production server so these steps are really just relevant information for the project	VS2008
2	Project created at C:\inetpub\wwwroot\refundSM	refundSMAApplication.zip		
3	Solution project (refundSM.sln) was created by VS2008 at C:\refundSM	refundSMsolution.zip		
4	Edit the web.config to point the DBSERVER entry to the production server; set debug to FALSE
